W. R. HEARST.

## AN AMERICAN PAPER FOR THE AMERICAN PEOPLE

Now Build That entered upon a Canal.

The Nicaragua Canal question has new phase. The concession of the

Maritime Canal Company expired on Monday, and the Cragin-Eyre syndicate succeeded to all the rights of the old corporation. It is true that the Maritime Canal Company claims that since its failure to carry out its contract within the stipulated period may be attributed to various causes over which it had no control it is entitled to an extension of time, but the Government of Nicaragua does not look at the matter in that light. It has the power to determine which company shall be put in possession of the works, unless forcibly overruled by the United States, and there is no doubt that this power will be exercised in favor of the Cragin-Eyre syndicate. Nor is there the least probability that the United States will interfere in behalf of the old corporation.

The situation is now materially simplified. As long as the Maritime Canal Company was in the field with certain vested rights, not merely technical but equitable, arising from the expenditure of money and effort through a long term of years in the actual work of construction, we were more or less hampered in carrying out the wish of the American people that the canal should be built as a Government enterprise. But there is no such trouble in dealing with the Cragin-Eyre syndicate. That combinatechnical rights it has acquired have been gained subject to the knowledge that the United States expected to construct the canal itself. All we shall have to do. therefore, as far as the syndicate is concerned, is to pay it whatever it has actually invested, which cannot be much, registered, we have no national system of their professional lights. and invite it to move on.

There is no doubt that Nicaragua will system. way of the inauguration of that great and accurate as possible.
